

Ducklings term review

What a busy term! We started off our new topic whilst still learning from home; I couldn't wait to share my find from the Forest school.

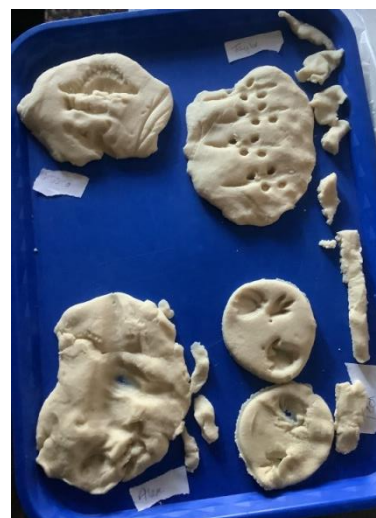

The children had some great ideas on what might have laid the egg and then what came out of it. We decided that it might have been a dinosaur and then investigated the different types, we now know about herbivores, carnivores and omnivores.

Evie sorting out our dinosaurs.

We have also researched what a Palaeontologist is then made our own fossils out of salt dough.

creating a dinosaur land

Waiting for our dinosaur egg to hatch.

We have enjoyed our Forest school sessions, where we have climbed trees, remade our dens, used natural materials to make shapes, practised our fire lighting and tried finding fossils.

climbing trees

Making shapes out of natural material

fire lighting

Dinosaurs have been a great topic for the children and they have fully immersed themselves in the learning, there are many more examples on their tapestry profiles.
