

## Kestrels Science

We started our week off by becoming inventors.

We had some fantastic ideas ranging from a fast food robot to a well detailed extension on a house!

Below is how we understand innovation.

We then discussed some key terminology:

Vaccine

Bacteria

Fungi

Microbe

Virus

And germs

Inventions to build

New things to make

New things to see

Other things to design

Vital ideas

A new product

Thinking in detail

Evidence

Grace

(Yr 4 Kestrels)

**I** nvent

**N** ew ideas

**N** ever ending ideas

**O** bjects to make

**V** arious ideas

**A** ctions

**T** hink deeply

**E** nd product

Emelia

(Yr 3 Kestrels)

## What is Science?

Activity based learning, where you learn about chemicals and gases.

**Oliver**

Is everywhere, it includes the weather, plants, planets, rocks and even more.

**Charlie**

Is when you test things and you try things out to prove if you are right.

**Lexie**

It's where you discover or test ideas out. Where you  
see amazing things happen.

**Rosie**

Is where you do practical things, then you figure  
things out for yourself and keep trying it. Science  
happens everywhere you look.

**Holly**

Science is when you follow a method and keep trying  
something until you get it right.

**Leon**
